The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a hitch assembly with a base, a jaw having a receptor connected to the base, a biasing member biasing the jaw assembly towards the support surface and a release member configured to pivot relative to the base and the jaw assembly having an arm configured to engage the receptor to cause upward movement of the jaw assembly upon downward force imparted to the release member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
